

The Peep Squirrel™ Binding Machine Instructions

Mounting

The binding machine will work properly only if it is mounted to a table or vertically onto a wall. Screws are enclosed for this purpose.

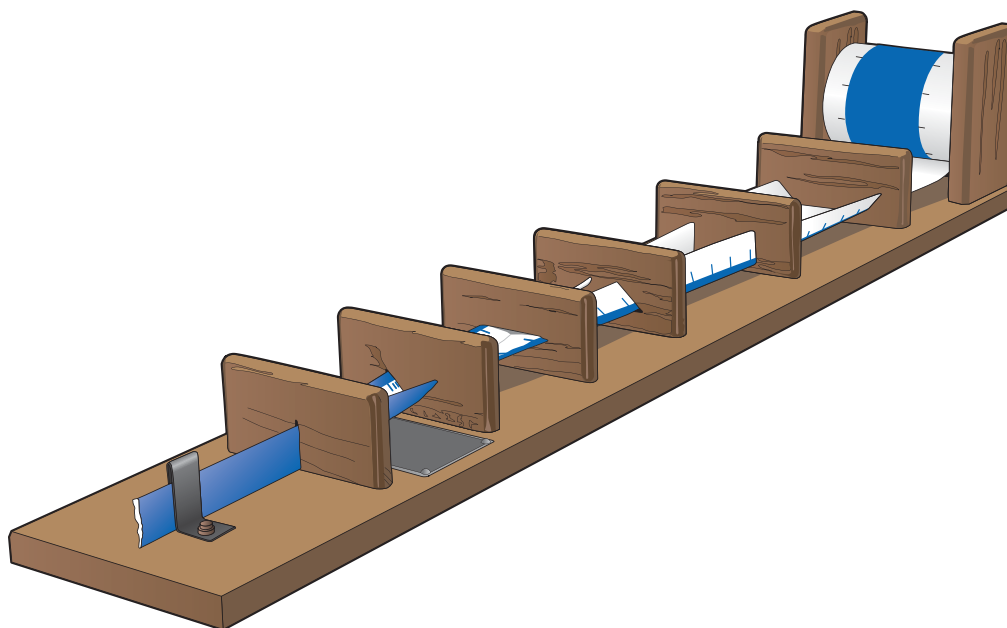

Threading

Place a new roll into the unwind using the dowel. The roll must unwind from the bottom. Fold the leading edge of the paper lengthwise and cut it to a point. Thread the point through each of the dies and the metal clip.

Operation

Pull the folded binder slightly upward as you draw it through the metal clip. Cut the binding strip to the length you need. For best results, use scissors.

Call 888-978-4816 for service if you have any problems.
