

# The Peep Squirrel™ Binding Machine Instructions

## Mounting

The binding machine will work properly only if it is mounted to a table or vertically onto a wall. Screws are enclosed for this purpose.

## Threading

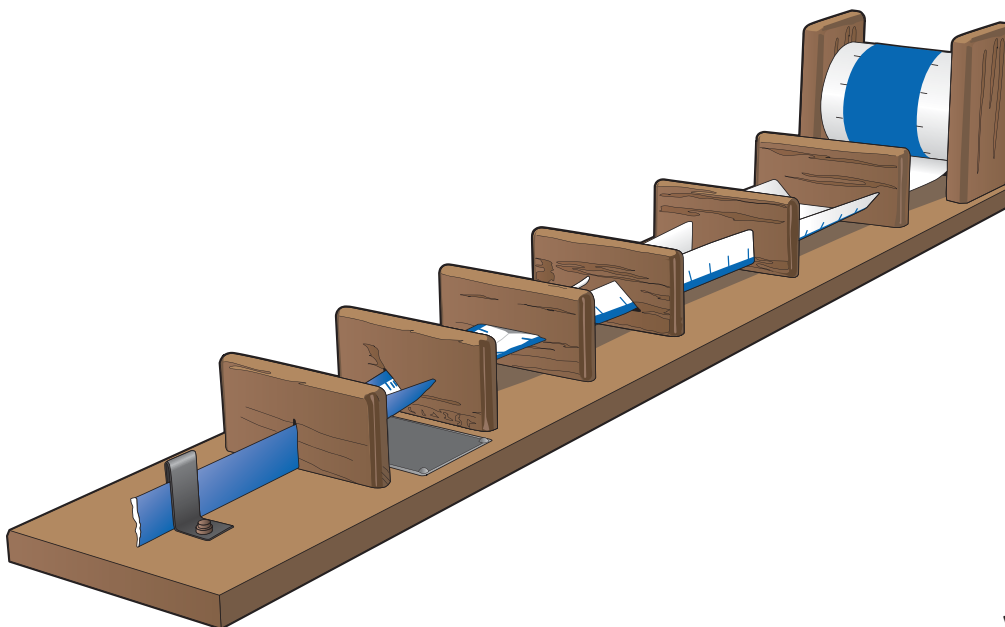

Place a new roll into the unwind using the dowel. The roll must unwind from the bottom. Fold the leading edge of the paper lengthwise and cut it to a point. Thread the point through each of the dies and the metal clip.

## Operation

Pull the folded binder slightly upward as you draw it through the metal clip. The first few rolls of paper will be tight until the paper breaks in the dies.

Cut the binding strip to the length you need. For best results, use scissors.
