

The Peep Squirrel™ Post Binders

Extra-strength binders for extra-large sets

Peep Squirrel™ Post Binders are designed to bind sets that are too thick for stapled paper binders. Rigid plastic or chipboard strips, along with posts and compression caps, are used together to make a super-strong binder that can secure up to 500 sheets.

No need for drill presses, complicated machines, or messy wood drill bits. All you need is a handheld drill, a hollow paper drill bit, and a mallet. Our hollow paper drill bit adapter chucks up in a normal 3/8" drill. Our hollow paper drill bit fits into the adapter, and allows you to quickly and easily hand drill holes through 2" of paper.

Both plastic and chipboard binders are available. Plastic binders are made from polystyrene and are recyclable. Chipboard binders are also recyclable, and contain 30-100% recycled content. Both are available in black or white, and are 1/16" thick x 1-1/4" wide. Custom printed binders can be printed with black, blue, red, green, orange, or white ink.

Do you want your binders pre-drilled? We can pre-drill your binders with 1/4" diameter holes on 6" centers. The pre-drilled binders make it easier to drill through the set by acting as a drilling template when drilling through the paper.

Different sizes and styles of posts and caps are available. Nine different post lengths range from 3/8" to 2" long, with either permanent or removeable caps. Posts and caps are made from polystyrene plastic and are available in either black or white.

Call, fax, e-mail, or visit our web site to place your order. Satisfaction guaranteed or your money back.
