

The Peep Squirrel™ Post Binders

Extra-strength binders for extra-large sets

Peep Squirrel™ Post Binders are designed to bind sets that are too thick for stapled paper binders. Rigid polystyrene plastic or chip board strips, along with posts and compression caps, are used together to make a super-strong binder that can secure up to 500 sheets.

No need for drill presses, complicated machines, or messy wood drill bits. All you need is a handheld drill, a hollow paper drill bit, and a mallet. Our hollow paper drill bit adapter chucks up in an everyday 3/8" drill. Our hollow paper drill bit fits into the adapter, and allows you to quickly and easily hand drill holes through 2" of paper.

Now available pre-drilled. We can now supply you with binders that are pre-drilled with 1/4" dia holes. The pre-drilled binders make it easier to drill through the set by acting as a drilling template when drilling through the paper.

NEW

Different sizes and styles of posts and caps are available. Nine different post lengths range from 3/8" to 2" long, with either permanent or removeable caps.

Advertise your company with custom printed binders. Add your name, logo, company information, etc. to your binders.

Now available in plastic or recycled chip board. We now offer post binders made from either polystyrene plastic (black, blue or white) or chip board (black or white). Custom printed binders can be printed with black, blue, white, red, or green ink. Posts and caps are made from plastic and available in either black or white.

NEW
